

New Zealand's biggest One NZ store has 30,000 seats. Three days at One NZ Stadium, Ōtautahi Christchurch.

THE WEEKEND

Fri 16 – Sun 18 April 2027

THE MOMENT

Warriors home game, Sat 5:00pm

THE ASK

\$3.0m to run it, \$16.0m issuance
ceiling

THE PRIZE

The 11-point Canterbury gap, worth
\$60m

Three in ten Cantabrians are on our network.
Seven in ten of their friends and family are not.

3 in 10

Canterbury connections on One NZ

▼ 11 points below our normal markets

Every other region sits between 33% and 44%.
Canterbury alone sits at 30%, and it is not a coverage problem — it is a presence problem. We have never given Cantabrians a reason to switch that they could not get anywhere else.

Share is of addressable consumer mobile connections, not of population: $682,000 \text{ population} \times 81\% = 550,000$, of which 30% is ours.
The \$60m is $60,500 \times \$41 \text{ ARPU} \times 24 \text{ months}$ — revenue, not margin.

ADDRESSABLE CONNECTIONS

550,000

Canterbury, consumer mobile

OURS TODAY

165,000

30% share

THE GAP TO PARITY

60,500

connections, 11 points

WHAT THAT IS WORTH

\$60m

revenue over 24 months

Take the store to them.

We are not opening a pop-up on the concourse. For three days we take exclusive ownership of the whole venue and run it as a One NZ store that happens to have a rugby league pitch in it.

Fri–Sun exclusive ownership 180 service positions 420 retail crew 19 partner brands

02

Six zones, one ring, one arena.

- 01 North concourse · the retail floor**
180 service positions. Port-ins, new connections, upgrades, plan changes. The largest single One NZ trading floor ever stood up.
- 02 East concourse · the One Wallet bar**
Wallet activations, Phone Dollars issued and spent in the same visit, and the QR wall where codes are scanned and sent.
- 03 South concourse · the partner village**
Starlink dome and SpaceX engineers, Kogan, Mighty Ape, and the device suppliers. Nineteen brands under one roof.
- 04 West concourse · the stage**
New Zealand Olympic team, the Warriors squad not playing, and the big-screen Phone Dollars moments through the day.
- 05 The arena**
Friday it is the student zone. Saturday it is a Warriors home game. Sunday it is open to families, boots on the grass.
- 06 Gates and forecourt**
Free bus and tram drop-off, entry, scan points. No parking, by design — free transport is how we keep the precinct moving.

Schematic only

Zoning intent, not a venue drawing

Everything a store does. Nothing a pop-up can.

THE FLOOR

A full One NZ store, at ten times the scale.

Live on the One NZ network, on our own systems, with our own people. Port-ins, sales, transactions and wallet activations all complete on the floor — nobody leaves with a form to fill in later.

11,600

transactions of capacity across 34 trading hours

Port-ins, completed on site

The one thing a stand cannot do and a store can.
Number kept, SIM live, device in hand, before they walk back out.

55%

2,950 forecast of 5,400 capacity

Sales and upgrades

Full device range on site with stock behind the counter, not a catalogue and a courier.

One Wallet activations

Phone Dollars issued, seen and spent inside the same visit. The proposition made physical.

Service and billing

Plan changes, billing queries, faults — same day, at a counter, by someone who works in a store.

Business and IoT desk

Canterbury SMEs, with the account team on site rather than on a callback list.

05 / 11

one.nz

The whole house of brands, in one building.

PARTNER BRANDS ON SITE

19

Suppliers, reseller channels, sport and civic partners — flown in for the weekend and trading, not just branding a wall.

Confirmed in principle 12

Still in discussion 7

Exclusive to this weekend 4

Branded to the last chip

Every concession in the building trades in One NZ livery for the weekend — the cheapest reach in the plan, and the only one 54,500 people hold in their hands.

One thousand Phone Dollars, both ways.

Anyone in the country can send \$1,000 to anyone else in the country. If the person they send it to is not on One NZ and joins, they get \$1,000 in their One Wallet — and so does the person who sent it. The next three scenes cover what that converts and what it costs.

\$1,000 each way \$3.0m to deliver \$8.70m effective incentive +\$9.26m at 36 months

18,900 codes, 4,150 connections.

WHERE THE 18,900 COMES FROM

Through the doors	54,500
Scanned a code · 45%	24,500
Sent at least one on · 35%	8,600
Valid sends each	2.2
Codes delivered	18,900

WEEKEND TOTAL

4,150 from codes, plus
2,950 connected on the
floor over the three days.

7,100 new connections attributed to
the weekend, before any halo.

Every figure here is modelled. The three assumptions worth arguing about are the 35% send rate, the 22% code conversion and the 2.2 valid sends — move any of them and the whole scene moves.

\$3.0m to put it on, line by line.

LINE	AMOUNT	SHARE	COMMIT BY	BASIS
Venue Exclusive hire Fri–Sun, matchday rights, bump-in and bump-out	\$720,000	24.0%	16 Oct 26	Scoped
Retail build and systems 180 service positions, power, comms, private APN, porting terminals, POS	\$560,000	18.7%	15 Jan 27	Scoped
Brand campaign Four-week Canterbury-weighted burst. The national heavy-up is cut.	\$520,000	17.3%	30 Nov 26	Estimate
Retail crew 420 people, 260 flown in, accommodation, allowances, store backfill	\$400,000	13.3%	1 Mar 27	Estimate
Contingency at 10% Held centrally, released against named variations only	\$273,000	9.1%	Held	Policy
Partner village 19 brands. Build and freight now largely partner-funded.	\$230,000	7.7%	15 Jan 27	Estimate
Free transport Buses and trams three days, regional shuttles Sunday	\$170,000	5.7%	1 Mar 27	Scoped
Total delivery cost	\$3,000,000	100%	—	—

LINE	AMOUNT	SHARE	COMMIT BY	BASIS
Content, safety and compliance Live production, social, security, traffic management, medical, insurance	\$127,000	4.2%	Rolling	Scoped
Scoped costed against a comparable delivered event Estimate no comparable, widest variance, quote before commitment				
Total delivery cost Down from \$7.53m as originally scoped. The cut is real: no national campaign heavy-up, a four-week lead-in instead of six, partner-funded village build, and contingency at 10%. Phone Dollars are not in this table — they are in scene 10.	\$3,000,000	100%	—	—

At \$3.0m the weekend nearly washes its face on its own.

Read the fourth and fifth columns together: on the 7,100 connections the weekend itself produces this now lands at \$0.49m under water rather than \$4.33m — cutting delivery from \$7.53m to \$3.0m is what closes it. Everything above zero comes from the halo column, and that remains the single assumption most worth attacking.

Modelled · each cohort valued over its own 36 months

Three days to change a market.

Canterbury is the one region where we are not competitive. It is also the one region with a 30,000-seat room that sells out every fortnight. Those two facts have not been put in the same sentence before, and the weekend is what happens when they are.

25 September

Approve the \$3.0m delivery budget and the \$16.0m Phone Dollars issuance ceiling. Both, or the venue hold lapses and there is no 2027 window.

9 October

Confirm the reward cap at five and the day-31 unlock. Anyone can still gift \$1,000 to as many people as they like — only the sender’s reward is capped.

16 October

Mandate to sign venue exclusivity, Saturday included. Friday and Sunday alone still work, at a third of the reach.
